Message from the Guest Editors

Dear Colleagues, we are proud to announce our special issue for Pediatric Orthopedic and Trauma Surgery.

Pediatric injuries, respectively of the growing skeleton have the risk to severely impact lifestyle and mobility despite an extremely favourable healing potential. Further, trauma still represents the number one cause of death among children. Due to their altered physiology and anatomy, children are not to be treated like adults. This applies to polytrauma care and fractures of the growing skeleton but also to the treatment of intraarticular (such as knee and shoulder) pathologies and posttraumatic deformities. Further the epidemiology and characteristics of paediatric injuries often vary with the appearance of trend sports among children and adolescents. These are various important factors that make further investigations of pediatric injuries necessary.

Last but not least, the Covid-19 pandemic has created new challenges in the treatment and management of pediatric injuries and possible effects have to be investigated.

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), and [other databases](#).

Journal Rank: JCR - Q2 (Pediatrics) / CiteScore - Q2 (Pediatrics, Perinatology and Child Health)
