Message from the Guest Editor

Developmental delays have major impacts on children in the developing stage, which cause various degrees of motor delay, intellectual disabilities, epilepsy, and other deficits. The diagnoses of developmental delay are dependent on traditional screening by questionnaire checklists followed by a group of specialists working on pediatric, neurological, psychiatric, and psychological evaluations. The clinical complexity and uncertainty make a definite clinical diagnosis difficult.

This Special Issue is dedicated to compiling the most recent knowledge about genetic diagnosis in children with developmental delay.

Keywords

- developmental delay
- genetic diagnosis
- polymerase chain reaction (PCR)
- fluorescence in situ hybridization (FISH)
- array comparative genomic hybridization (array CGH)
- target panel testing
- whole exome sequencing
- whole genome sequencing

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), and [other databases](#).

Journal Rank: JCR - Q2 (Pediatrics) / CiteScore - Q2 (Pediatrics, Perinatology and Child Health)
