closed (15 June 2024)

Message from the Guest Editors

Dear Colleagues,

Recent years have seen cardiovascular magnetic resonance (CMR) emerge as a powerful and versatile tool in pediatric cardiology. This non-invasive and radiation-free technique is in fact not only the gold standard for volumetric and function assessment but also offers unique tissue characterization, providing valuable insights into several congenital and acquired heart conditions. The key role of this modality in the pediatric field is testified by the recent advances, clinical applications, and research breakthroughs that contributed to altering the care of our young patients.

The aim of this Special Issue of *Children*, entitled “Cardiovascular Magnetic Resonance in Pediatrics”, is to collect articles discussing these advances in detail with the ultimate goal of deepening knowledge in this challenging field.

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), and [other databases](#).

Journal Rank: JCR - Q2 (Pediatrics) / CiteScore - Q2 (Pediatrics, Perinatology and Child Health)
