5 October 2024

Message from the Guest Editor

Dear Colleagues,

In most countries, pediatric trauma represents the main cause of death of children.

The principles of trauma care remain the same both for children and adults, but the differences in care required for the optimal treatment of the injured child demand specific damage control. Approximately 60% of pediatric polytrauma patients have fractures of the upper and lower extremities; thus, the orthopedic surgeon plays an important role in the care of these patients.

This issue focuses on polytrauma in children and polytrauma-related skeletal injuries, on trauma in neonatal age, and on age-related imaging for diagnosis and follow-up. Another focus is on wound healing in children, with an emphasis on firecracker injuries, plastic surgery and keloid management.

Dr. Maurizio De Pellegrin

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), and [other databases](#).

Journal Rank: JCR - Q2 (Pediatrics) / CiteScore - Q2 (Pediatrics, Perinatology and Child Health)
