submissions:

5 February 2025

Message from the Guest Editors

Dear Colleagues,

Managing colorectal disorders in children, from diagnosis to surgical treatment, requires highly specialized pediatricians and pediatric surgeons due to procedures that may be sometimes technically challenging. Thanks to discoveries made by basic sciences, we are understanding more and more about the pathogenesis of congenital malformations and acquired colorectal diseases. Moreover, nowadays, pediatric surgeons are equipped with highly performant and miniaturized instruments, allowing us to perform procedures that were previously unthinkable. Furthermore, we are now facing the needs of a population of adults treated during childhood for colorectal diseases; transitional care is a burning issue for pediatricians and pediatric surgeons all over the world.

The aim of this Special Issue is to collect experiences in the field of colorectal diseases in children: from diagnosis to treatment, novelties, transitional programs, and testimonies from developing countries.

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), and [other databases](#).

Journal Rank: JCR - Q2 (Pediatrics) / CiteScore - Q2 (Pediatrics, Perinatology and Child Health)
