Message from the Guest Editors

Dear Colleagues,

Pediatric minimally invasive surgery (MIS) is a constantly developing field, ranging from fetoscopic procedures in unborn children to robotic assisted bariatric surgery in overweight adolescents. This wide range of techniques and patients is what makes pediatric MIS exciting and challenging.

With this Special Issue, we would like to focus on the wide spectrum of pediatric minimally invasive surgery, including well-established procedures, new and visionary ideas, technical developments, perils and pitfalls, controversial procedures, and things we stand to learn from our general, thoracic, and visceral surgical colleagues or the standardized minimally invasive surgical treatment of our young patients.

We do not want to bring just another review of “what has been done so far”, but instead we are trying to compile reports from inventive colleagues from all medical disciplines who are pushing the frontiers of minimally invasive surgical treatment to the benefit of children.

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), and [other databases](#).

Journal Rank: JCR - Q2 (Pediatrics) / CiteScore - Q2 (Pediatrics, Perinatology and Child Health)
