Deadline for manuscript submissions:

**closed (31 March 2023)**

### Message from the Guest Editors

Dear Colleagues,

Pediatric dentistry is dedicated to the oral health of children from infancy through their teen years. Dental diseases are very common in children. They range from caries to malocclusion to include very rare and complex diseases of multidisciplinary interest. Pediatric dental health includes knowledge of the diagnostics, clinical and instrumental factors, pathophysiology, and preventive and therapeutic aspects of dental pediatric patients. The objectives to be pursued are the identification of advanced diagnostic pathways which can help to define the various types of oral diseases in the developmental age and the acquisition of specific skills for prevention, interception, and treatment.

The purpose of this Special Issue is to describe and update the therapies of pediatric dental diseases with the most recent research, also including rare dental diseases that require early diagnosis and systemic diseases with their manifestations in the oral cavity.

## Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Pediatrics) / CiteScore - Q2 (Pediatrics, Perinatology and Child Health)
