Message from the Guest Editor

Dear Colleagues,

Cyberbullying is defined as the use of electronic media to cause willful repeated harm to others who cannot readily defend themselves. Prevalence rates of those who are cyber-victimized, perpetrate cyberbullying, or both suggest that cyberbullying is a well-recognized public health issue which affects the physical and psychological health of children and adolescents.

For this Special Issue, we invite authors to submit original research articles and reviews that focus on cyberbullying-related topics. We would appreciate it if you could forward this to your team members and colleagues who may also be interested in the topic.

Please contact us if you have any questions or suggestions.
