Message from the Guest Editor

Dear Colleagues,

As we all know, *Helicobacter pylori* is the most common infection worldwide and associated with an increased risk of gastric cancer, being defined as a class I carcinogen by the World Health Organization. This infection is usually acquired during childhood, and if left untreated its persistence into adulthood is imminent. The development of effective prophylactic and therapeutic strategies represents a crucial need in pediatrics, being the single opportunity to decrease the incidence of gastric carcinogenesis during adulthood. Considering the complex pathway from simple infection towards gastric carcinogenesis, influenced by both host and bacterial features, multidisciplinary teamwork is required in order to clearly define the role of each component in this process and to face the challenge of preventing or successfully treating this infection.

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), and [other databases](#).

Journal Rank: JCR - Q2 (Pediatrics) / CiteScore - Q2 (Pediatrics, Perinatology and Child Health)
