Message from the Guest Editor

Dear Colleagues,

According to WHO, birth asphyxia is thought to account for four million deaths worldwide every year. Approximately a third of all deaths below five years of age occur secondary to perinatal asphyxia. Many of these deaths can be prevented with basic neonatal resuscitation maneuvers aimed at effectively ventilating the lung.

The American Academy of Pediatrics and the American Heart Association, evaluate resuscitation science through the International Liaison Committee on Resuscitation. This Special Issue focuses on emerging concepts in neonatal resuscitation—science of resuscitation, improvement in education techniques and dissemination of knowledge. Hot topics in resuscitation science include oxygen use in the delivery room for premature infants, placental transfusion during resuscitation, approach to meconium stained amniotic fluid and coordination of chest compressions and ventilation.

We invite you to contribute articles on any aspect of neonatal resuscitation to this Special Issue.

Prof. Satyan Lakshminrusimha

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), and [other databases](#).

Journal Rank: JCR - Q2 (Pediatrics) / CiteScore - Q2 (Pediatrics, Perinatology and Child Health)
