Message from the Guest Editors

Myopia is one of the most common ocular disorders that affects children and adolescents, which may lead to irreversible visual impairment. With increasing prevalence in recent decades, myopia has reached epidemic proportions in many regions and has become a global public health threat. The progression of myopia typically happens faster at younger ages, and an uncorrected refractive error may impose significant burden on children and adolescents regarding education achievement and social capacity.

This Special Issue aims to provide advanced understandings of the epidemiological significance of myopia, the genetic and environmental exposures in association with myopia progression, and the efficacy and clinical applications of preventive interventions in children and adolescents.

Departments of Child Health and Neurology, University of Missouri, 400 Keene Street, Columbia, MI 65201, USA

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), and [other databases](#).

Journal Rank: JCR - Q2 (Pediatrics) / CiteScore - Q2 (Pediatrics, Perinatology and Child Health)
