Message from the Guest Editors

Over the last decade, the number of children and adolescents living with chronic (or long-term) health conditions has risen worldwide. Living with a chronic health condition in childhood can be a cause for significant burden and persistent stress for children, adolescents and their families, and can result in lasting emotional and social consequences that impact daily life, functioning and wellbeing.

The goal of this Special Issue in *Children* is to highlight the recent advances in psychosocial interventions for children and adolescents living with a range of chronic health conditions. We welcome original research considering novel approaches, including user-centred design and technology-based interventions, in which the primary target is the child and/or adolescent, with a focus on improving their clinical and psychosocial functioning outcomes.

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [Embase](#), and [other databases](#).

Journal Rank: JCR - Q2 (Pediatrics) / CiteScore - Q2 (Pediatrics, Perinatology and Child Health)
