# Abdominal Surgery in Pediatrics

## Message from the Guest Editor

Pediatric abdominal surgery is a vast field. The younger the child, the higher the incidence of connatal malformations as a reason for surgery. Nevertheless, malignant diseases of solid organs, a continuously rising number of inflammatory diseases in children and adolescents, represent an important issue. Finally, acute abdominal diseases such as appendicitis, intussusception, volvulus, and all kinds of herniation are important topics. The strategies in surgical therapy are continuously changing, and are under discussion. Minimally invasive approaches, interdisciplinary treatment strategies, robotics, endoscopic surgery, and new techniques are of great interest. Not all of these "new" strategies are validated and always better just because they are new and popular. Surgeons and researchers are invited and should be stimulated to contribute their manuscripts. The contributions can be of different character: experimental papers, review articles, systemic reviews, proposals for new strategic approaches, and prospective/retrospective case studies. Please avoid single case reports.

## **About the Journal**

## Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

## Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400 Keene Street, Columbia, MO 65211, USA

## **Author Benefits**

## **Open Access**

 free for readers, with article processing charges (APC) paid by authors or their institutions.

## **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, PMC. Embase, and other databases.

## **Journal Rank:**

JCR - Q2 (Pediatrics) / CiteScore - Q2 (Pediatrics, Perinatology and Child Health)
