Advances in Perinatal Maternal Mental Health and Infant Sensory Development

Message from the Guest Editors

Maternal perinatal mental health plays a robust causal role in shaping infant development. Among the various types of development, sensory development has received relatively less empirical investigation. However, sensory processing is associated with important maternal (e.g., prenatal and postnatal anxiety and depression symptom severity), infant (e.g., sleep quality and other forms of development), and maternal–infant (e.g., duration and frequency of breastfeeding) variables. Additionally, sensory symptoms (i.e., reactivity to sensory input and unusual interest in sensory aspects of the environment) constitute one criterion for autism spectrum disorder, suggesting that they may be an important research target in understanding neurodevelopmental disorders. Therefore, on behalf of the *Children* Editorial Office, we are pleased to invite you to submit research papers and review articles. Research areas may include (but are not limited to) the following: prenatal, postnatal, or perinatal mental health, sensory development in infancy, sensory processing in infancy, and early neurodiversity.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400 Keene Street, Columbia, MO 65211, USA

Author Benefits

Open Access

— free for readers, with article processing charges (APC) paid by authors or their institutions.
