Comprehensive Care of Critically Ill Infants and Children

Message from the Guest Editor

The landscape of Pediatric Critical Care Medicine has changed remarkably, on a global level, over the last few decades, allowing infants and children to survive illnesses and injuries previously associated with a poor outcome. Collaboration between experts in pediatric critical care medicine has promoted the creation of important guidelines, for example, for the treatment of septic shock and traumatic brain injuries. These and other important guidelines are periodically revised and updated as indicated, and adapted to locally-available resources. This Special Issue is focused on dissemination of state-of-the art global pediatric critical care, tapping on the experience of seasoned experts in the field, emerging clinical and research talent, and educators. We invite contributors to send expert, evidence-based opinion in their fields of interest, original research articles, clinical review articles, special articles, and illustrative case reports. I look forward to receiving your contribution.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400 Keene Street, Columbia, MO 65211, USA
