

Special Issue

Urology in Pediatrics

Message from the Guest Editor

Pediatric urology has been developed by many pediatric urologists and pediatric surgeons from all over the world. This Special Issue on Urology in Pediatrics focuses primarily on open and endoscopic surgical techniques. The most noteworthy advance in pediatric urology has been the development of minimally invasive surgery, including endourology, laparoscopy, retroperitoneoscopy, and robotic surgery, which have the advantages of reducing postoperative pain, improving the cosmetic results, and reducing the time of postoperative hospitalization. The authors are invited to discuss the state-of-the-art knowledge on the main pediatric urology techniques, based on literature review and their clinical experience.

Guest Editor

Prof. Dr. Giovanni Cobellis

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or comprehensive review for consideration and publication in *Children* (ISSN 2227-9067). *Children* is an open access journal—research articles, reviews, and other content are published online immediately after acceptance. The scientific community and the general public have unlimited free access to the content as soon as it is published. The journal focuses on sharing clinical, epidemiological, and translational science relevant to children's health. We would be pleased to welcome you as one of our authors.

Editor-in-Chief

Prof. Dr. Paul R. Carney

Departments of Child Health and Neurology, University of Missouri, 400 Keene Street, Columbia, MO 65211, USA
