Thessaloniki, University Campus,  
54124 Thessaloniki, Greece

Deadline for manuscript  
submissions:

**closed (31 January 2019)**

### **Message from the Guest Editors**

Dear Colleagues,

During the last decades, there is a growing interest in climate variability and change by scientific community, due to their economic, social and ecological impacts. Knowledge of spatial and temporal climate distribution is fundamental to several disciplines such as geography, hydrology, forest management, agriculture, ecology and others. Moreover future climate projections is essential for rural development and planning and infrastructure works programming.

Topics of interest include, but are not limited to:

- Regional Climate Models
- Climate Variability
- Climate Change Impacts
- Dynamic and Statistical Downscaling Techniques
- Spatial Mapping of Meteorological Parameters

Mr. Stefanos Stefanidis

Dr. Konstantia Tolika
