submissions:

20 July 2024

Message from the Guest Editor

Dear Colleagues,

We are pleased to introduce this Special Issue titled “Antibacterial, High-Oxidation Coatings for Environmental Applications”.

Applying antimicrobial and highly oxidative agents for environmental protection and indoor pollution control has gained popularity in recent years. This Special Issue aims at exploring the production of and treatments using antimicrobial and highly oxidative agents on various surfaces, as well as their potential. We invite authors to submit original articles to showcase innovative concepts, treatment engineering strategies and potential evaluations to the global scientific community. Professional commentaries discussing, recommending and proposing new technology developments are also welcomed.

Mickiewicz University in Poznań,
ul. Wszechnicy Piastowskiej 3, 61-
614 Poznań, Poland

Message from the Editorial Board

Now more than ever, research is called for to produce technologies and improve knowledge to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed at the center of most contemporary research. Surface science and engineering play a key role in this regard. Refining surfaces and their modifications provides new materials, architectures and processes with a huge potential to aid most societal challenges. *Coatings* is a well-established, peer-reviewed, online journal that focuses on the dissemination of publications in the field of surface science and engineering. *Coatings* publishes original research articles that report cutting-edge results and review papers on the hottest topics.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Materials Science, Coatings & Films*) / CiteScore - Q2 (*Surfaces and Interfaces*)
