Thin Films for Electronic Devices

Guest Editors:

Prof. Dr. Nam-Hoon Kim

Department of Electrical Engineering, Chosun University, Gwangju 61452, Republic of Korea

Prof. Dr. Liang He

School of Mechanical Engineering, Sichuan University, Chengdu 610065, China

Deadline for manuscript submissions:

closed (30 April 2022)

Message from the Guest Editors

This Special Issue of *Coatings* on "Thin Films for Electronic Devices" encompasses all aspects of advanced thin films for state-of-the-art optoelectonic, photonic, energy, electronic, and neuromorphic devices in the field of their properties, fabrication, characterization, and applications. The aim of this Special Issue is to present the latest experimental and theoretical developments of thin films for diverse electronic devices, through a combination of original research papers and review articles from leading groups around the world.

The topic of interest includes but is not limited to:

- Prospect of future thin films from the perspective of electronic devices:
- Fundamental studies and modeling of thin films for electronic devices;
- Novel thin films for newly developed devices in a wide range of optoelectronics, photonics, photovoltaics, thermoelectrics, sensing, and neuromorphics;
- Fabrication technologies for novel devices;
- Characterization/properties/surface/interface/defect/bour

Editors-in-Chief

Prof. Dr. Wei Pan

State Key Laboratory of New Ceramics and Fine Processing, School of Materials Science & Engineering, Tsinghua University, Beijing 100084, China

Dr. Emerson Coy

NanoBioMedical Centre, Adam Mickiewicz University in Poznań, ul. Wszechnicy Piastowskiej 3, 61-614 Poznań, Poland

Message from the Editorial Board

Now more than ever, research is asked to deliver knowledge and technologies to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed in the spotlight of most contemporary research. Surface science and engineering play a key role in this regard, with an incredible potential in delivering new and deep scientific understanding and technical solutions essential to solve most of the major societal challenges.

Coatings is a well-established, peerreviewed, online journal dedicated to the vibrant field of surface science and engineering. Coatings publishes original research articles that report cutting-edge results and review papers that make the point on the hottest research topics.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Surfaces, Coatings and Films*)
