

Surface Modification of Metals and Alloys

Guest Editors:

Prof. Dr. Nuria Llorca-Isern

Departmental Section of Science and Engineering of Materials, Universitat de Barcelona, Barcelona, Spain

Dr. Oriol Rius-Ayra

Department of Materials Science and Physical Chemistry, Faculty of Chemistry, Universitat de Barcelona, 08028 Barcelona, Spain

Deadline for manuscript submissions:

closed (31 December 2023)

Message from the Guest Editors

This Special Issue on Surface Modification of Metals and Alloys concerns the many different and innovative approaches that can be used to transform the metallic surface by means of physical, chemical, mechanical or biological characteristics providing different properties from the ones originally found on these surfaces allowing functionality for a given application.

In particular, the topics of interest are:

- Characterization of engineered surfaces (tribological, corrosion, morphology, structure, composition);
- Treatments covering the surface of metals and alloys:
 - Conversion coatings;
 - Spraying processes;
 - Deposition processes;
- Treatments altering the surface of metals and alloys:
 - Mechanical and thermomechanical processes;
 - Laser-beam-based technologies;
 - Diffusion processes;
 - Special processes;
- Functional and multifunctional coatings and films;
- Novel surface modification techniques;
- Additive manufactured surfaces.

Mickiewicz University in Poznań,
ul. Wszechnicy Piastowskiej 3, 61-
614 Poznań, Poland

Message from the Editorial Board

Now more than ever, research is asked to deliver knowledge and technologies to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed in the spotlight of most contemporary research. Surface science and engineering play a key role in this regard, with an incredible potential in delivering new and deep scientific understanding and technical solutions essential to solve most of the major societal challenges.

Coatings is a well-established, peerreviewed, online journal dedicated to the vibrant field of surface science and engineering. Coatings publishes original research articles that report cutting-edge results and review papers that make the point on the hottest research topics.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Surfaces, Coatings and Films*)
