# Semiconductor Thin Films and Coatings: Microstructure, Properties, and Applications

Guest Editor:

#### Prof. Dr. Yanli Pei

School of Electronics and Information technology, Sun Yatsen University, Guangzhou, China

Deadline for manuscript submissions:

closed (31 December 2023)

# **Message from the Guest Editor**

A semiconductor thin film is a thin film formed of semiconductor material. Semiconducting thin films are used in fundamental structures microelectronics. nanoelectronics, and biological systems. Single-crystalline, polycrystalline, or amorphous semiconductor thin films are commonly used in devices such as thin-film transistors, sensors, photodetectors, and solar cells. With the development of thin-film preparation technology, the scientific community is gradually valuing various functional semiconductor thin films. Semiconductor thin films are also widely used in multiple fields. This issue provides a platform for scholars in related fields to discuss the microstructure, performance, and application semiconductor thin films/coatings. Research areas may include (but are not limited to) the following:

- Single crystal, polycrystal, or amorphous semiconductor thin films.
- Novel semiconductor thin film coating methods.
- Characterization of semiconductor thin films, microstructure, electrical, and optical properties.
- Semiconductor thin film applications, TFT, sensors, or others.

# **Editors-in-Chief**

#### Prof. Dr. Wei Pan

State Key Laboratory of New Ceramics and Fine Processing, School of Materials Science & Engineering, Tsinghua University, Beijing 100084, China

## Dr. Emerson Coy

NanoBioMedical Centre, Adam Mickiewicz University in Poznań, ul. Wszechnicy Piastowskiej 3, 61-614 Poznań, Poland

# **Message from the Editorial Board**

Now more than ever, research is asked to deliver knowledge and technologies to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed in the spotlight of most contemporary research. Surface science and engineering play a key role in this regard, with an incredible potential in delivering new and deep scientific understanding and technical solutions essential to solve most of the major societal challenges.

Coatings is a well-established, peerreviewed, online journal dedicated to the vibrant field of surface science and engineering. Coatings publishes original research articles that report cutting-edge results and review papers that make the point on the hottest research topics.

## **Author Benefits**

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Surfaces, Coatings and Films*)
