

## State of the Art on Coatings, Thin Films, Nano Materials and Structures: Production and Applications

Guest Editor:

**Dr. Joaquim Carneiro**

Centre of Physics of Minho and  
Porto Universities, University of  
Minho, Azurém Campus, 4800-  
058 Guimarães, Portugal

Deadline for manuscript  
submissions:

**closed (31 December 2021)**

### Message from the Guest Editor

Dear Colleagues,

Coatings, thin films and nano-materials and -structures are playing a crucial and ever-increasing role in engineering, medicine and the widest range of industrial applications. New improved production and characterization technics as well as better modelling tools are constantly being developed. Topics covering but are not limited to the following concepts:

- Coatings and thin films
- Production and deposition methods
- Characterization of coatings, thin films and nanostructures
- Theoretical analysis
- Computer modeling and simulation to predict coating' properties, performance, durability and reliability
- Laser, chemical and thermal treatment and processing of surfaces and coatings
- Degradation mechanisms of coatings
- Functional and multifunctional coatings
- Smart materials
- Nanostructured coatings
- Nanotechnology, science and engineering
- Nano-coatings and -structures for photonics
- Organic, inorganic and hybrid coatings
- Composite materials
- Coatings and thin films for sensing

## Editors-in-Chief

**Prof. Dr. Wei Pan**

State Key Laboratory of New  
Ceramics and Fine Processing,  
School of Materials Science &  
Engineering, Tsinghua University,  
Beijing 100084, China

**Dr. Emerson Coy**

NanoBioMedical Centre, Adam  
Mickiewicz University in Poznań,  
ul. Wszechnicy Piastowskiej 3, 61-  
614 Poznań, Poland

## Message from the Editorial Board

Now more than ever, research is called for to produce technologies and improve knowledge to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed at the center of most contemporary research. Surface science and engineering play a key role in this regard. Refining surfaces and their modifications provides new materials, architectures and processes with a huge potential to aid most societal challenges. *Coatings* is a well-established, peer-reviewed, online journal that focuses on the dissemination of publications in the field of surface science and engineering. *Coatings* publishes original research articles that report cutting-edge results and review papers on the hottest topics.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Materials Science, Coatings & Films*) / CiteScore - Q2 (*Surfaces and Interfaces*)
