

Thin Films for Thermoelectric Applications: Second Volume

Guest Editors:

Prof. Dr. Clara M. Gómez

Institute of Materials Science
(ICMUV), University of Valencia,
46980 Paterna, Spain

Dr. Mario Culebras

Institute of Materials Science
(ICMUV), Universitat de València,
C/ Catedràtic José Beltrán 2,
46980 Paterna, València, Spain

Deadline for manuscript
submissions:
closed (30 April 2024)

Message from the Guest Editors

Although other interesting related topics not mentioned in the above list are also welcome, intended submissions should generally align with thin films for thermoelectric applications.

The topics of interest include, but are not limited to:

- The synthesis of novel thermoelectric materials;
- Deposition techniques for thin films of thermoelectric materials;
- Characterization methods of the thermoelectric properties of thin films;
- The structural characterization of thermoelectric thin films;
- Quantum confinement, phonon drag and 2D materials;
- The physics and chemistry of novel thermoelectric materials for thin films;
- The theory and modeling of thermoelectric thin films;
- Thermoelectric thin film sensors and applications;
- Thermoelectric nanodevices.

Editors-in-Chief

Prof. Dr. Wei Pan

State Key Laboratory of New
Ceramics and Fine Processing,
School of Materials Science &
Engineering, Tsinghua University,
Beijing 100084, China

Dr. Emerson Coy

NanoBioMedical Centre, Adam
Mickiewicz University in Poznań,
ul. Wszechnicy Piastowskiej 3, 61-
614 Poznań, Poland

Message from the Editorial Board

Now more than ever, research is asked to deliver knowledge and technologies to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed in the spotlight of most contemporary research. Surface science and engineering play a key role in this regard, with an incredible potential in delivering new and deep scientific understanding and technical solutions essential to solve most of the major societal challenges.

Coatings is a well-established, peerreviewed, online journal dedicated to the vibrant field of surface science and engineering. Coatings publishes original research articles that report cutting-edge results and review papers that make the point on the hottest research topics.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Surfaces, Coatings and Films*)
