

## Advanced Technology in Environmental Remediation and Resource Utilization

Guest Editors:

**Dr. Deling Yuan**

School of Environmental and  
Chemical Engineering, Yanshan  
University, Qinhuangdao, China

**Prof. Dr. Shoufeng Tang**

School of Environmental and  
Chemical Engineering, Yanshan  
University, Qinhuangdao 066004,  
China

Deadline for manuscript  
submissions:

**closed (25 January 2024)**

### Message from the Guest Editors

Dear Colleagues,

With the development of industrialization, environmental pollution problems are becoming increasingly severe. All forms of pollutants (organics, heavy metals, and microplastics) are discharged into the environment, polluting water bodies, atmosphere, and soil, which results in seriously damaging ecological environments and impacts human life. Various environmental remediation technologies have been researched and applied for removing contaminants and remediating ecological environment.

We are pleased to invite you to submit manuscripts in the form of complete research papers, short communications, or reviews. This Special Issue aims to present prominent advances in relation to advanced oxidation processes, environmental catalysis technology, environmental-function materials, and resources reuse in environment.

In this Special Issue, original research articles and reviews are welcome. Research areas may include the following:

- Environmental remediation;
- Resource utilization;
- Advanced oxidation process;
- Environmental catalysis;
- Environmental function material.

We look forward to receiving your contributions.

## Editors-in-Chief

### Prof. Dr. Wei Pan

State Key Laboratory of New  
Ceramics and Fine Processing,  
School of Materials Science &  
Engineering, Tsinghua University,  
Beijing 100084, China

### Dr. Emerson Coy

NanoBioMedical Centre, Adam  
Mickiewicz University in Poznań,  
ul. Wszechnicy Piastowskiej 3, 61-  
614 Poznań, Poland

## Message from the Editorial Board

Now more than ever, research is asked to deliver knowledge and technologies to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed in the spotlight of most contemporary research. Surface science and engineering play a key role in this regard, with an incredible potential in delivering new and deep scientific understanding and technical solutions essential to solve most of the major societal challenges.

Coatings is a well-established, peerreviewed, online journal dedicated to the vibrant field of surface science and engineering. Coatings publishes original research articles that report cutting-edge results and review papers that make the point on the hottest research topics.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Surfaces, Coatings and Films*)
