Department of Mechanics,  
Mathematics and Management,  
Polytechnic University of Bari,  
Bari, Italy

**Dr. Rosa Di Mundo**

Dipartimento di Ingegneria Civile,  
Ambientale, del Territorio, Edile e  
di Chimica-DICATECh, Campus,  
Via Orabona 4, 70125 Bari, Italy

Deadline for manuscript  
submissions:

**closed (31 May 2020)**

### Message from the Guest Editors

The “Anti-Adhesive Surfaces”, is devoted to research and review articles covering every aspect related to metallic, ceramic, polymeric, and composite coatings or modified surface layers aimed at reducing/minimizing surface adhesion to a broad range of counterparts, with experimental and/or modelling approaches.

The topics covered by this Special Issue are not limited to superhydrophobic, superliquiphobic, and omniphobic surfaces, but also comprise anti-stain, anti-static, anti-icing, anti-fog, anti-bacterial, and anti-biofilm surfaces.

In this regard, manuscripts focused on bio-inspired or naturally-inspired surfaces/coatings displaying one or more of these properties are very welcome.

The topics of interest include but are not limited to antiadhesive surface/coatings for:

- applications in aerospace;
- automotive;
- biomedical applications;
- cookware and furniture;
- building and construction;
- textiles

an Open Access Journal by MDPI

### Prof. Dr. Wei Pan

State Key Laboratory of New  
Ceramics and Fine Processing,  
School of Materials Science &  
Engineering, Tsinghua University,  
Beijing 100084, China

### Dr. Emerson Coy

NanoBioMedical Centre, Adam  
Mickiewicz University in Poznań,  
ul. Wszechnicy Piastowskiej 3, 61-  
614 Poznań, Poland

## Message from the Editorial Board

Now more than ever, research is asked to deliver knowledge and technologies to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed in the spotlight of most contemporary research. Surface science and engineering play a key role in this regard, with an incredible potential in delivering new and deep scientific understanding and technical solutions essential to solve most of the major societal challenges.

Coatings is a well-established, peerreviewed, online journal dedicated to the vibrant field of surface science and engineering. Coatings publishes original research articles that report cutting-edge results and review papers that make the point on the hottest research topics.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Surfaces, Coatings and Films*)
