

## Coatings for Building Applications

Guest Editors:

**Prof. Dr. Noni-Pagona  
Maravelaki**

School of Architecture, Technical  
University of Crete, 73100 Chania,  
Greece

**Prof. Dr. Elisa Franzoni**

Department of Civil, Chemical,  
Environmental and Materials  
Engineering (DICAM), University  
of Bologna, 40131 Bologna, Italy

Deadline for manuscript  
submissions:

**closed (30 June 2024)**

### Message from the Guest Editors

The protection of buildings with smart coatings has long been a challenge for the coating industry, due to the impact of pollutants and synergism of climate parameters, intensively affecting the building façade. Into this framework, research activities were addressed and focused on self-cleaning, hydrophobic, and super-hydrophobic coatings, exhibiting durability to the environmental loading and compatibility to the building substrate.

In this Special Issue, contributions on the above topics will be welcomed, and authors are encouraged to submit their works concerning inorganic and organic coatings with specific properties addressing both building and environment protection.

The topics of interest include but are not limited to the following:

- Photocatalytic and self-cleaning coatings;
- Hydrophobic, super-hydrophobic, and water/oil repellent actions;
- Coatings with biocidal and antifungal functions;
- Anti-graffiti properties;
- Energy-efficient paints;
- Renders with nano-additives;
- Coatings with CO<sub>2</sub> sequestration action.

## Editors-in-Chief

### Prof. Dr. Wei Pan

State Key Laboratory of New  
Ceramics and Fine Processing,  
School of Materials Science &  
Engineering, Tsinghua University,  
Beijing 100084, China

### Dr. Emerson Coy

NanoBioMedical Centre, Adam  
Mickiewicz University in Poznań,  
ul. Wszechnicy Piastowskiej 3, 61-  
614 Poznań, Poland

## Message from the Editorial Board

Now more than ever, research is asked to deliver knowledge and technologies to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed in the spotlight of most contemporary research. Surface science and engineering play a key role in this regard, with an incredible potential in delivering new and deep scientific understanding and technical solutions essential to solve most of the major societal challenges.

Coatings is a well-established, peerreviewed, online journal dedicated to the vibrant field of surface science and engineering. Coatings publishes original research articles that report cutting-edge results and review papers that make the point on the hottest research topics.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (Physics, Applied) / CiteScore - Q2 (Surfaces, Coatings and Films)
