

## Ferroelectric Thin Films and Composites

Guest Editor:

**Prof. Dr. Xiaoyan Lu**

School of Civil Engineering,  
Harbin Institute of Technology,  
Harbin, China

Deadline for manuscript  
submissions:

**31 August 2024**

### Message from the Guest Editor

Ferroelectric materials are of great interest due to their potential applications in various functional devices, such as piezoelectric sensors, transducers, energy harvesters, memories, microwave filters, resistors in integrated circuits, and microelectromechanical systems.

We would like to invite you to submit your original research to this *Coatings* Special Issue entitled “Ferroelectric Thin Films and Composites”. The scope of this Special Issue includes all aspects of research within the broad fields of coatings and ferroelectric materials, including experimental and theoretical studies as well as reviews. In particular, the topics of interest include but are not limited to:

- Ferroelectric thin films: fabrication, characterization, related theory, and applications.
- Ferroelectric composites: fabrication, characterization, simulation, and applications.
- Functional devices and their applications.
- Artificial-intelligence-driven material characterization and data mining.
- Any other aspects of ferroelectric materials.

## Editors-in-Chief

### Prof. Dr. Wei Pan

State Key Laboratory of New  
Ceramics and Fine Processing,  
School of Materials Science &  
Engineering, Tsinghua University,  
Beijing 100084, China

### Dr. Emerson Coy

NanoBioMedical Centre, Adam  
Mickiewicz University in Poznań,  
ul. Wszechnicy Piastowskiej 3, 61-  
614 Poznań, Poland

## Message from the Editorial Board

Now more than ever, research is asked to deliver knowledge and technologies to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed in the spotlight of most contemporary research. Surface science and engineering play a key role in this regard, with an incredible potential in delivering new and deep scientific understanding and technical solutions essential to solve most of the major societal challenges.

Coatings is a well-established, peerreviewed, online journal dedicated to the vibrant field of surface science and engineering. Coatings publishes original research articles that report cutting-edge results and review papers that make the point on the hottest research topics.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (*Physics, Applied*) / CiteScore - Q2 (*Surfaces, Coatings and Films*)
