

Special Issue

Advances in the Film Flow Transport Phenomena

Message from the Guest Editors

This Special Issue, “Advances in the film flow transport phenomena”, intends to focus on recent developments and findings in the field of fluid dynamics, specifically regarding film flow, a type of fluid flow that occurs when a thin layer of fluid flows over a surface. The articles within this Special Issue will delve into the mechanisms and physics behind film flow, as well as the different techniques and methodologies used to study and analyze it. Some possible areas of focus for articles could include the following aspects:

- The use of computational fluid dynamics (CFD) to simulate and analyze film flow
- The effect of various parameters (such as surface tension, viscosity, and fluid velocity) on film flow
- The use of various experimental techniques to study film flow, such as laser-induced fluorescence and molecular dynamics simulations
- The use of film flow in industrial applications, such as heat exchangers and lubrication systems.

Guest Editors

Dr. Kohilavani Naganthran

Institute of Mathematical Sciences, Faculty of Science, Universiti Malaya, Kuala Lumpur 50603, Malaysia

Prof. Dr. Ishak Bin Hashim

Department of Mathematical Sciences, Faculty of Science & Technology, Universiti Kebangsaan Malaysia, Bangi 43600, Malaysia

Deadline for manuscript submissions

closed (31 December 2023)

About the Journal

Message from the Editorial Board

Now more than ever, research is asked to deliver knowledge and technologies to solve the major challenges faced by our society. The development of new materials and devices for (without the ambition to be exhaustive) energy, health and food technology, together with the need for establishing processes that reduce the impact on critical resources and the environment, is indeed in the spotlight of most contemporary research. Surface science and engineering play a key role in this regard, with an incredible potential in delivering new and deep scientific understanding and technical solutions essential to solve most of the major societal challenges.

Coatings is a well-established, peerreviewed, online journal dedicated to the vibrant field of surface science and engineering. Coatings publishes original research articles that report cutting-edge results and review papers that make the point on the hottest research topics.

Editors-in-Chief

Prof. Dr. Wei Pan

State Key Laboratory of New Ceramics and Fine Processing, School of Materials Science & Engineering, Tsinghua University, Beijing 100084, China

Dr. Emerson Coy

NanoBioMedical Centre, Adam Mickiewicz University in Poznań, ul. Wszechnicy Piastowskiej 3, 61-614 Poznań, Poland

Author Benefits

Open Access

– free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Physics, Applied) / CiteScore - Q2 (Surfaces, Coatings and Films)
