Message from the Guest Editors

This Special Issue has the purpose of analyzing and providing the effects of the recession, geopolitical events, and the coronavirus pandemic on the volatility of commodity prices. We are also interested in topics regarding the impacts of the U.S.–China hegemony competition, the recent Fed rate hike, and digital (business) innovation on commodities markets. We are expecting to contribute not only to empirical research, but also to economic theory by empirically analyzing changes in various commodity markets, including primary products, foreign exchange, bonds, and stock markets.

Deadline for manuscript
submissions:

31 December 2024
