

Signal Processing and Machine Learning in Data Science

Guest Editors:

Dr. Maria Trigka

Industrial Systems Institute (ISI),
Athena Research and Innovation
Center, 26504 Patras, Greece

Dr. Elias Dritsas

Department of Electrical and
Computer Engineering, School of
Engineering, University of Patras,
26504 Patras, Greece

Deadline for manuscript
submissions:

closed (30 June 2024)

Message from the Guest Editors

Data science is a field of study that focuses on the extraction of valuable information from noisy data, and incorporates various disciplines, such as data engineering, data preprocessing, visualization, predictive analytics, data mining, machine learning and statistics. In recent years, there has been rapidly growing interest in the mathematical and theoretical aspects of data science. This manifests in deterministic and non-deterministic models (i.e., probabilistic and a family of probabilistic known as statistical) in order to provide performance guarantee, robustness, reusable and interpretable results.

The digital transformation of information systems has made feasible the effective use of data science techniques such as artificial intelligence (AI) and machine learning (ML) for various applications.

The aim of this Special Issue is to provide original high-quality innovative ideas and research solutions (for both theoretical and practical challenges) for data analysis and modelling with the aid of artificial intelligence and machine learning in various domains and applications.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

You are invited to submit the results of your research for consideration and publication in *Computation*, an international open access journal, which is published monthly online by MDPI.

The editorial board and staff of *Computation* are dedicated to establishing a benchmark journal for the world scientific and engineering communities for original research articles, reviews, conference proceedings (i.e., peer reviewed full articles), and communications, in the cutting-edge areas of computational biology, computational chemistry, and computation in engineering.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), CAPlus / SciFinder, Inspec, dblp, and other databases.

Journal Rank: JCR - Q2 (*Mathematics, Interdisciplinary Applications*) / CiteScore - Q2 (*Applied Mathematics*)
