

Computation and Analysis of Remote Sensing Imagery and Image Motion

Guest Editor:

Dr. Evangelos Maltezos

I-SENSE Group of the Institute of Communication and Computer Systems (ICCS), 15773 Zografou, Greece

Deadline for manuscript submissions:

closed (9 February 2022)

Message from the Guest Editor

Dear Colleagues,

The technological development in the fields of image processing, computer vision, and remote sensing provides new tools and automated solutions for several applications, such as situational awareness, urban development, change detection, forest and crop monitoring, emergency response, etc.

This Special Issue invites manuscripts that present both academia and industry research for processing the information contained into remote sensing data. As this is a broad area, there are no constraints regarding the field of application. In this context, the aim of this Special Issue is to present the current state-of-the-art methods for the computation and analysis of remote sensing data and image motion in several fields of applications.

Dr. Evangelos Maltezos

Message from the Editor-in-Chief

You are invited to submit the results of your research for consideration and publication in *Computation*, an international open access journal, which is published monthly online by MDPI.

The editorial board and staff of *Computation* are dedicated to establishing a benchmark journal for the world scientific and engineering communities for original research articles, reviews, conference proceedings (i.e., peer reviewed full articles), and communications, in the cutting-edge areas of computational biology, computational chemistry, and computation in engineering.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), CAPlus / SciFinder, Inspec, dblp, and other databases.

Journal Rank: JCR - Q2 (*Mathematics, Interdisciplinary Applications*) / CiteScore - Q2 (*Applied Mathematics*)
