Technology, Nanjing 210094,
China

Deadline for manuscript
submissions:

closed (31 August 2024)

Message from the Guest Editor

This Special Issue aims to provide an exchange platform for the latest achievements in the field of granular matter including new theories, technologies, and approaches, as well as its applications to geomechanics, civil engineering mechanics, and other fields. Contributions regarding granular flow, segregation and mixing, packing problems, and nonlinear acoustic physics in granular matter are of particular interest. Related interdisciplinary research, such as on active matter, colloid, and traffic flow, is also encouraged. Both original research and review articles are welcome.

Keywords:

- granular materials
- granular flow
- nonlinear acoustic physics
- active matter
- colloid

Message from the Editor-in-Chief

Welcome to *Condensed Matter* (ISSN 2410-3896)! It gives me great pleasure to invite you to publish in the journal. We are looking to build a collection of high quality research articles, supported by a community from across the field of condensed matter physics. In this task, I will be assisted by a highly qualified editorial board. We accept papers on basic research as well as applications, and experimental or theoretical work. Currently the journal is indexed by ESCI (Web of Science) and hope you can consider *Condensed Matter* as an exceptional home for your manuscript.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), Inspec, CAPlus / SciFinder, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 21 days after submission; acceptance to publication is undertaken in 4.8 days (median values for papers published in this journal in the first half of 2024).
