submissions:
closed (31 March 2019)

Message from the Guest Editor

Delivery systems are widely used in cosmetic products, and refer to the formulation technologies used to protect and stabilise the active ingredients put in cosmetics. A delivery system is as crucial to the cosmetic formulation as the actives themselves. A good system preserves valuable skincare actives, without the use of harmful chemicals. A variety of delivery systems have been used or have the potential to be used in the cosmetic formulations, such as lipid nanoparticles, microneedles, patches, and polymeric and emulsion-based delivery systems. This Special Issue will address new developments in the delivery systems for cosmetics, covering recent advantages and future directions in the field, by original research papers and review articles.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Enzo Berardesca

Department of Dermatology and
Cutaneous Surgery, University of
Miami, Miami, FL 33136, USA

Message from the Editor-in-Chief

Cosmetics is an international, scientific, open access journal on the science and technology of cosmetics, published by MDPI online quarterly. Original articles, reviews and other acceptance. The scientific community and the general public can unlimitedly access the content free of charge as soon as it is published. As a new journal, the publication fees are fully waived for papers submitted to *Cosmetics* in 2017. We would be pleased to welcome you as one of our authors.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, ESCI (Web of Science), CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (*Dermatology*) / CiteScore - Q1 (Surgery)
