

## Preparation and Properties of Alloys by Physical Vapor Deposition

Guest Editors:

**Prof. Dr. Sida Liu**

Institute of Advanced  
Technology, Shandong  
University, Jinan, China

**Dr. Xuejian Xie**

Institute of Novel  
Semiconductors, Shandong  
University, Jinan, China

**Dr. Umberto Prisco**

Department of Chemical,  
Materials and Production  
Engineering, University of Naples,  
Federico II, Piazzale Tecchio 80,  
80125 Naples, Italy

Deadline for manuscript  
submissions:

**closed (31 December 2023)**

### Message from the Guest Editors

Sida Liu is now a professor of Shandong University, a national young talent. The self-designed and improved Al-Ti-B-C (TCB) seed alloy series products have been exported to more than ten countries such as Germany, Italy and Korea, and have been promoted and applied in well-known enterprises. Presided over or participated in many research projects in Mainland China, Hong Kong, Germany, etc. He has published more than 20 SCI papers in Science Advances, Acta Materialia, JACS, Materials Today and other journals, including more than 10 papers by the first/corresponding author, and served as guest editor of Crystal. The research experience has been reported by CCTV, DAAD and other media or institutions.

Xuejian Xie is now a professor of Shandong University, "Qilu Young Scholar". He has been mainly engaged in the single crystal growth and performance characterization of wide bandgap semiconductor materials. Till now, he has published more than 30 SCI/EI papers, authorized 6 invention patents. He has also undertaken the national and provincial level scientific projects as project leader and take part in National key research and development program as key member.

an Open Access Journal by MDPI

## Editor-in-Chief

### Prof. Dr. Alessandra Toncelli

Department of Physics, University  
of Pisa, 56126 Pisa, PI, Italy

## Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), [Ei Compendex](#), [CAPlus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (Crystallography) / CiteScore - Q2 (Condensed Matter Physics)
