an Open Access Journal by MDPI

## Young Crystallographers Across Europe

Guest Editors:

**Dr. Benny Danilo Belviso**

CNR - Institute of  
Crystallography, Bari, Italy

**Dr. Mattia Lopresti**

Dipartimento di Scienze e  
Innovazione Tecnologica DISIT,  
Università degli Studi del  
Piemonte Orientale "Amedeo  
Avogadro", 13100 Vercelli, VC,  
Italy

Deadline for manuscript  
submissions:

**30 November 2024**

### Message from the Guest Editors

Dear Colleagues,

Crystallographers are not missing the opportunity to exploit new techniques coming from other scientific fields and are learning to properly merge their atomic-level structural information with that from other structural techniques progressing in leaps and bounds in the field of the investigation of biomacromolecular structures in particular. In this context, the scientific contribution of new generations of crystallographers is essential to embrace change in a dynamic way and introduce an increasing number of innovations.

This Special Issue aims to provide an overview of research activities carried out in Europe by young and emerging scientists working in different fields of crystallography and with innovative techniques. Contributions from all subfields are encouraged, including both experimental and computational work, with the aim of showcasing a multidisciplinary collection of recent results from future leaders in European and international crystallography.

## Editor-in-Chief

### Prof. Dr. Alessandra Toncelli

Department of Physics, University of Pisa, 56126 Pisa, Italy

## Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), [CAPus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Crystallography*) / CiteScore - Q2 (*Condensed Matter Physics*)
