

## Ferroelectrics Materials for Microwave Devices

Guest Editors:

**Dr. Caroline Borderon**

**Dr. Kevin Nadaud**

**Dr. Raphaël Renoud**

**Prof. Dr. Hartmut W. Gundel**

Deadline for manuscript  
submissions:

**closed (30 April 2022)**

### Message from the Guest Editors

Dear Colleagues,

We invite researchers to submit original papers that discuss the development of ferroelectric materials, including thin-film, nanostructured, and multilayered forms that are or can be included in microwave devices.

This Special Issue focuses on ferroelectric materials for microwave devices. The possible topics include but are not limited to the following:

- Growth of ferroelectric thin films or nanostructures, including the modeling of crystal growth or reaction mechanisms;
- Property characterization (dielectric, ferroelectric, piezoelectric, etc.) and its relationships to external conditions, such as electric field, stress, temperature, etc.
- Advances in microwave device development (conception, simulation, material integration) based on ferroelectric materials using thin films or nanostructures;
- Microstructure analysis and correlation of the observed properties and their modeling.

## Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), [CAPus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Crystallography*) / CiteScore - Q2 (*Condensed Matter Physics*)
