Message from the Guest Editors

Graphene quantum dots, which are zero-dimensional graphene nanostructures, have attracted significant attention due to their unique properties and potential applications in various fields, including optoelectronics, energy storage, biomedicine, and catalysis. The Special Issue on "Design, Synthesis, and Characterization of Graphene Quantum Dots" aims to provide a comprehensive platform for researchers, scientists, and engineers to share their cutting-edge research, methodologies, and findings related to GQDs.

Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.
