Deadline for manuscript
submissions:

15 April 2025

Message from the Guest Editors

Dear Colleagues,

Recent advances in photocatalyst materials represent a rapidly evolving field that brings together physicists, materials scientists and chemists from around the world. In focus are materials that use light to drive chemical reactions, with significant emphasis on enhancing their efficiency and expanding their applications. While traditional semiconductor photocatalysts, such as TiO_2 , have dominated the field for decades, novel materials and strategies are pushing the boundaries of performance.

Recent progress in photocatalyst design is marked by both incremental but innovative modifications to existing materials and entirely new approaches. Among the cutting-edge developments are hybrid photocatalysts, including those based on metal-organic frameworks (MOFs) and perovskites, which offer unprecedented versatility and tunability. Additionally, nanostructuring and surface engineering have allowed researchers to manipulate light absorption and reaction kinetics in ways not previously possible.

Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), [CAPus](#) / [SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Crystallography*) / CiteScore - Q2 (*Condensed Matter Physics*)
