Resin Ceramics Composite

Guest Editors:

Prof. Dr. Go Inoue

Cariology and Operative Dentistry, Graduate School of Medical and Dental Sciences, Department of Oral Health Sciences, Tokyo Medical and Dental University (TMDU), Tokyo, Japan

Dr. Amr Saad

Assistant professor, Operative dentistry department, Batterjee Medical College, Jeddah, Saudi Arabia

Deadline for manuscript submissions:

closed (28 February 2021)

Message from the Guest Editors

Resin composite and ceramics are widely used for restorative treatment, including treatment due to aesthetic requests from patients. The development of adhesion helps the expansion of indications, especially in using resin composite. Moreover, additional effects from several ions, such as fluoride, calcium and phosphate, and functional monomers, such as 10-MDP and GPDM, will lead to outstanding reactions with tooth substrate. Especially in developed countries, many problems are arising in relation to an aging society, tooth wear, root caries, tooth fracture, missing teeth and so on. To solve these problems and protect teeth from aging, new technologies, materials and procedures are being created.

We invite researchers to contribute to the Special Issue titled “Resin Ceramics Composite”, which is intended to serve as a unique multidisciplinary forum covering broad aspects of science, technology and the application of resin composite and ceramics.

Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), [CAPlus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Crystallography*) / CiteScore - Q2 (*Condensed Matter Physics*)
