### Message from the Guest Editors

Dear Colleagues,

With the contribution of experts from chemical engineering, biotechnology and biochemistry, mathematics, and physics, this Special Issue is intended to contribute with robust and scalable protein crystallization strategies to boost its implementation in the pharmaceutical and biotechnological industry. Reports on the following topics are welcome:

- Strategies to enhance the crystallization efficiency and decrease the process time;
- Strategies to enable the rapid establishment of phase diagrams;
- Advanced imaging, spectroscopy, and light scattering techniques;
- Modelling of protein crystallization processes (population balance modelling, etc.);
- Crystallization from “impure” protein solutions;
- Influence of hydrodynamics (mixing, shear, etc.) on protein crystallization.
