Deadline for manuscript
submissions:
closed (30 September 2020)

The theme of the Special Issue is “The Application of High-k Dielectric Materials in Solid-State Devices”. The interdisciplinary study of high-k dielectric materials is in the confluence of materials science, surface science, chemistry, and applied physics, and has become an identifiable unified discipline of scientific endeavor. The Special Issue is intended to provide a unique international forum aimed at covering a broad description of results involving the essential characterizations of the important influences on high-k dielectric materials in solid-state devices. Authors are invited to submit original research articles as well as review articles to this Special Issue.

Keywords:

- high-k dielectric
- thin films
- high dielectric constant materials
- solid-state devices

of Pisa, 56126 Pisa, Italy

Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), [CAPus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Crystallography*) / CiteScore - Q2 (*Condensed Matter Physics*)
