

## Membrane Technology for Solid Particles Production

Guest Editor:

**Dr. Gianluca Di Profio**

Consiglio Nazionale delle  
Ricerche (CNR), Istituto per la  
Tecnologia delle Membrane  
(ITM), Università della Calabria,  
Via Pietro Bucci Cubo 17/C,  
Rende, CS, Italy

Deadline for manuscript  
submissions:  
**closed (20 June 2022)**

### Message from the Guest Editor

This Special Issue of *Crystals* intends to serve as a unique, multidisciplinary, and comprehensive forum covering broad aspects of science and technology underpinning the application of membrane-based operations to solidification processes.

Submissions may focus on any of the following non-exhaustive list of topics:

- Membrane-assisted crystallization or precipitation of bio(macro)molecules (proteins, nucleic acids, polysaccharides, amino acids, organic materials, and their macromolecular complexes);
- Crystallization in pores and in nano-confined, patterned, or irregular surfaces, including modeling and simulation works;
- Reactive membrane crystallization processes;
- Membrane crystallization from brines and industrial (waste)streams for zero waste generation and mining purposes;
- Membrane crystallization for process intensification in hybrid systems and water desalination;
- Membrane-assisted precipitation processes;
- Microfluidics and microdevices for membrane-assisted crystallization.

an Open Access Journal by MDPI

## Editor-in-Chief

### Prof. Dr. Alessandra Toncelli

Department of Physics, University  
of Pisa, 56126 Pisa, Italy

## Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), [CAPus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Crystallography*) / CiteScore - Q2 (*Condensed Matter Physics*)
