Metal Phosphonates and Phosphinates

Guest Editors:

Dr. Marco Taddei

Energy Safety Research Institute,
College of Engineering, Swansea
University - Bay Campus Fabian
Way, Swansea SA1 8EN, UK

Dr. Ferdinando Costantino

Department of Chemistry Biology
and Biotechnologies, University
of Perugia, Via Elce di Sotto 8,
06123 Perugia, Italy

Deadline for manuscript
submissions:
closed (30 April 2019)

Message from the Guest Editors

We are pleased to announce the forthcoming “1st European Workshop on Metal Phosphonates Chemistry—Materials for Energy Applications and Beyond”, which will be held at Swansea University, on 19 September, 2018, and to invite you to contribute to the joint Special Issue of *Crystals* entitled “Metal Phosphonates and Phosphinates”.

Metal phosphonates and phosphinates (MPPs) are a class of crystalline metal–organic compounds characterized by a fascinating coordination chemistry and vast structural diversity. These materials display exceptional thermal and chemical stability, which makes them attractive for practical applications.

The scientific program covers a broad range of topics, such as synthesis, advanced methods for characterisation, porous materials, molecular magnetic compounds, energy storage and heterogeneous catalysis. For more information about the workshop, please visit: <https://europosphonates.wordpress.com/>

Submission of original research papers or reviews to this Special Issue of *Crystals* is open for both participants of the workshop and other researchers working in the field of metal phosphonates and phosphinates.

of Pisa, 56126 Pisa, Italy

Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), [CAPus / SciFinder](#), and [other databases](#).

Journal Rank: JCR - Q2 (*Crystallography*) / CiteScore - Q2 (*Condensed Matter Physics*)
