Italy

**Prof. Dr. Michelina Catauro**

Department of Engineering,  
University of Campania "Luigi  
Vanvitelli", Via Roma 29, I-81031  
Aversa, Italy

Deadline for manuscript  
submissions:

**closed (28 February 2021)**

### Message from the Guest Editors

The purpose of this Special Issue is to publish high-quality research papers as well as review articles addressing recent advances on the Sol-Gel Method Applied to Crystalline Materials, describing the fundamental principles of crystallization of sol-gel systems in solution.

A study and comprehension of methods and mechanisms of the crystallization process for colloidal systems at temperatures less than 100 °C would allow a significant development of new materials using low-temperature sol-gel synthesis.

Potential topics include preparation methods, material characteristics, and applications of powder electrode materials.

## Message from the Editor-in-Chief

Welcome to *Crystals*, the journal dedicated to the fascinating world of crystallographic research! Crystals are more than mere decorative elements; they hold the key to understanding the fundamental structure of matter. Our mission is to explore the crucial significance of this research across various fields. From medicine to technology, chemistry to geology, crystals play a vital role. Their structure provides insights into new advanced materials, innovative drugs, and groundbreaking technologies. Through *Crystals*, we delve into the microscopic world to discover solutions that will shape the future. Join us on a journey through the *Crystals*, where science merges with beauty and innovation.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [Inspec](#), [CAPus / SciFinder](#), and [other databases](#).

**Journal Rank:** JCR - Q2 (*Crystallography*) / CiteScore - Q2 (*Condensed Matter Physics*)
