Message from the Guest Editors

Dear Colleagues,

Substantial studies have shown that weight loss in cancer is associated with poor prognosis, poor quality of life, lower activity level, increased treatment-related adverse symptoms, and reduced tumor response to therapy. The present Special Issue aims to highlight the crucial role of the nutritional assessment and management of cancer patients in relation to disease progression and prognosis. Novel dietary interventions and nutritional observational studies for the management, co-treatment, and prevention of cancer disease will also be presented.

- Nutritional assessment tools and their impact on cancer progression and survival.
- Dietary interventions for improving health related quality of life and prognosis of cancer patients.
- Nutritional observational studies related to cancer progression and prognosis.
- Dietary patterns and/or specific dietary food groups (e.g. fruits, legumes) and their bioactive compounds (e.g., phytochemicals, flavonoids, etc.) in the co-treatment and prevention of cancer disease.

Message from the Editor-in-Chief

I am honored and enthusiastic to serve as incoming Editor-in-Chief of *Current Oncology*. Since its establishment in 1994, *Current Oncology* has been playing an important role in the advancement of cancer care by disseminating new knowledge in the cancer care continuum. *Current Oncology* is affiliated with several key cancer societies and provides a global platform to share scientific progress in oncology. We strive for high standards and work together to maintain a rigorous and unbiased peer review process to publish high-quality articles. We have an outstanding editorial team which is committed to the success of *Current Oncology*.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase,** and **other databases.**

Journal Rank: JCR - Q2 (*Oncology*)
