

## Special Issue

# Evaluating and Improving Outcomes of Gastric Cancer Surgery

### Message from the Guest Editors

From a Western perspective, gastric cancer patients often present at an advanced stage and with a poor prognosis, resulting in limited treatment options. In North America, this leads to a 25% 5-year survival for gastric cancer patients. While surgical resection remains the cornerstone for curative intervention, there have been notable advancements in the treatment of gastric cancer over the past decade that have resulted in more favorable outcomes and prolonged survival. This Special Edition aims to summarize our current understanding of gastric and gastroesophageal cancer and examine advancements in surgical treatment modalities and outcomes of these diseases.

## About the Journal

### Message from the Editor-in-Chief

I am honored and enthusiastic to serve as incoming Editor-in-Chief of *Current Oncology*. Since its establishment in 1994, *Current Oncology* has been playing an important role in the advancement of cancer care by disseminating new knowledge in the cancer care continuum. *Current Oncology* is affiliated with several key cancer societies and provides a global platform to share scientific progress in oncology. We strive for high standards and work together to maintain a rigorous and unbiased peer review process to publish high-quality articles. We have an outstanding editorial team which is committed to the success of *Current Oncology*.
