closed (20 September 2023)

Message from the Guest Editors

Dear Colleagues,

Milk and its derivatives could be inhabited by not only beneficial but also detrimental microorganisms. Pathogenic microorganisms and their metabolites, if present in adequate amounts, may cause a risk for human health, besides an economic burden.

For this Special Issue of *Dairy*, dedicated to the “Microbial safety of milk and dairy products”, we invite you to submit contributions concerning any aspect of pathogenic microorganisms occurring in milk and dairy products, as well as those related to the development and application of mitigation strategies and methods to qualitatively and quantitatively detect them and/or their harmful metabolites at any step of production, storage, and distribution.

Dr. Vincenzina Fusco

Dr. Francesca Fanelli

Message from the Editor-in-Chief

Dairy (ISSN 2624-862X) is an international, peer-reviewed open access advanced forum for studies related to the advances in dairy science. It publishes reviews, regular research papers and short communications. Our aim is to encourage scientists to publish their experimental and theoretical results in as much detail as possible. There is no restriction on the maximum length of the papers. The full experimental details must be provided so that the results can be reproduced.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [ESCI \(Web of Science\)](#), [Scopus](#), [FSTA](#), and [other databases](#).

Journal Rank: CiteScore - Q1 (Agricultural and Biological Sciences (miscellaneous))
