Message from the Guest Editor

Dear Colleagues,

Scientific advances have made it possible to achieve highly predictable dental care. On the one hand, periodontal disease represents the sixth most widespread human disease, with approximately 35% of the world population affected by a form of periodontitis; it currently represents the main cause of the loss of dental elements. On the other hand, we know that the adequate control of inflammation associated with the achievement of excellent compliance by patients can stabilize the disease and allow the maintenance of teeth in the long term.

Similarly, osseointegrated implantology has extremely high success rates, so researchers can focus on the augmentation of hard tissues and soft tissues using tissue regeneration techniques specific to bone tissue and soft tissue augmentation techniques, with both autologous and heterologous grafts.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

The *Dentistry Journal* (ISSN 2304-6767) is an official, peer-reviewed publication of MDPI, which transmits original papers as well as review articles from the entire field of dentistry to the scientific community. The *Dentistry Journal* supports scientific innovations, and clinical and experimental research within the whole field of dentistry and its related areas. The *Dentistry Journal* in particular supports interdisciplinary and translational studies. The *Dentistry Journal* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, ESCI (Web of Science), PubMed, PMC,** and **other databases.**

Journal Rank: JCR - Q2 (*Dentistry, Oral Surgery and Medicine*) / CiteScore - Q2 (*General Dentistry*)
