### **Message from the Guest Editor**

This Special Issue is an overview of current, evidence-based materials available in the different disciplines of dentistry as regards the use of cone beam computed tomography (CBCT) in diagnosing various maxillofacial and dental conditions. It will review the available literature and highlight the availability, or lack thereof, of studies with a high level of evidence for several common diagnostic tasks, while also addressing the deficiencies noted with a view to developing evidence-based guidelines and appropriateness criteria for the use of CBCT in various dental specialties.
