Message from the Guest Editor

Dear Colleagues,

Dental health is influenced by the interactions of a multitude of factors at different levels, including geographical area, population, family, and individual levels. Understanding these influences of those interactions can inform effective and relevant policies and practices to improve dental health. The social and economic circumstances at different levels vary greatly between societies and populations. Those variations include economic circumstances, distribution of wealth, availability of technological advances, and even access to basic human needs, such as childhood education. All these differences can have an effect on human health, including oral health and dental care use. Research investigating variation in diseases and health care use between and within populations can inform our understanding of disease distribution and occurrence and help us to plan appropriate preventive measures.

Thank you very much!

Message from the Editor-in-Chief

The *Dentistry Journal* (ISSN 2304-6767) is an official, peer-reviewed publication of MDPI, which transmits original papers as well as review articles from the entire field of dentistry to the scientific community. The *Dentistry Journal* supports scientific innovations, and clinical and experimental research within the whole field of dentistry and its related areas. The *Dentistry Journal* in particular supports interdisciplinary and translational studies. The *Dentistry Journal* provides a unique opportunity to contribute high quality articles and to take advantage of its large readership.

Author Benefits

Open Access: free for readers, with **article processing charges (APC)** paid by authors or their institutions.

High Visibility: indexed within **Scopus, ESCI (Web of Science), PubMed, PMC,** and **other databases.**

Journal Rank: JCR - Q1 (Dentistry, Oral Surgery and Medicine) / CiteScore - Q2 (General Dentistry)
